

J O B S

There are already a lot of good job sites out there for librarians and information professionals. Rather than duplicating these efforts, we've linked to them instead. Eventually, we'll create a bot that searches the sites below and returns the results to you here – like a dogpile.com for library jobs. If you're a library student in need of a project and would like to design a search bot, we want to **hear from you**.

Lisjobs.com: The first stop for jobs and **excellent advice** on interviewing, statistics on salaries and links to articles on the profession.

Career development maven, Priscilla Shontz, launched **LIScareer.com** in November of 2001. It's starting out as a companion site to her book, *Jump Start Your Career in Library & Information Science* and is packed with useful advice pertaining to all aspects of embarking on a library career.

Library Job Postings on the Internet: Compiled and maintained by Reference/Systems Librarian Sarah Nesbeitt since 1995, this excellent resource receives over 182,000 visits per year, links to over 250 library employment sites, and is hailed as "the most frequently-consulted library employment site on the web." Equipped with a search engine to search for individual job ads as well.

Internet Library for Librarians claims to be the most popular information resource site for librarians since 1994. It certainly is comprehensive and a breeze to navigate. In their Library Job Opportunities, they list **10 sites** and provide a brief description for each.

Staffing Agencies

- **Library Associates**
- **Advanced Information Management**
- **Taylor and Associates**
- **Cadence Group**

Internship Programs

1. **[Research Library Residency & Internship Programs](#)**
2. **[LIBEX - The Bureau for International Library Staff Exchange](#)**
3. **[IRC/IRRT's International Visits and Exchanges](#)**
4. **[Mortenson Center for International Library Programs at UIUC](#)**
5. **[Information Bridges International](#)**
